1. The production of Phenol is no longer in the experimental stage. It is being manufactured regularly by the Uzinele Metalurgice Neferoase at Baia Mare (Metallurgical Factory for Non-Ferrous Metals). This factory is probably identical with the former Phenix works at Baia Mare. The output of the factory is not known. It is also not known whether any other factory in Rumania makes Phenol.
2. The No. 4 Pharmaceutical Factory at Bucharest receives from 4,000 to 5,000 liters of Phenol from Baia Mare for the manufacture of aspirin and for addition to Antigermine (sic). The Phenol is supplied in clay demi-johns, each with a capacity of 100 liters, and is brought by truck.
3. It is known that the Spic Factory produces white sulphur.
4. No details are known of the production of the No. 2 Pharmaceutical Factory.
5. No penicillin is being produced in Rumania, but experimental work is in progress.
